Importance of Women Rights

Prof. Maleka Shaheen

Dept. (Home. Sci)

Milliya College, Beed.

Introduction: Women's rights are the right and entitlements claimed for woman and girls worldwide, and formed the basis for the women's rights movement in the nineteenth century and feminist movement during the 20th Century.

The effort to secure equal rights for women and to remove gender discrimination from laws, institutions, and behavioural patterns the women's rights movement began in the nineteenth century, with the demand by some women reformers for the right to vote, known as suffrage, and for the Same legal rights as men.

Women's right claimed for women, equal to those of men, with respect to suffrage, property, the professional fields.

Women's rights as the freedom, liberties and opportunities that women have, especially the opportunity to be treated equal to and given the Same legal rights as men.

"According india's constitution, women are legal citizens of the country and have equal right with men. The status of women in India has been subject to many great charges over the past few millennia. Women have succeeded in improving their status and are improving day by day.

What is a Woman's right?

The women's rights is the fight for the idea that women should have equal rights with men. Over history this has taken the form of gaining property, rights, the women's suffrage, or the right of women to vote, reproductive rights, and the right to work for equal pay.

These rights include the right to live free from violence, Slavery and discrimination, to be educated, to own property to vote and to earn a fair and equal wage., As the now famous saying goes women's rights are human rights." That is to say, women are entitled to all of these rights.

Conclusion : Women are better off today, but still far from being equal with men. This have certainly improved for women, but at the top of both industry and govt the faces remain stubbornly male there have

been huge changes for women in terms of employment in the past decades, with women moving into paid employment outside the home in ways that their grandmothers and even their mothers could only dream of. Women are moving into jobs that used to be done by men. Although more women are working, they are offered still worse pay than men, in part-time jobs or in the huge informal employment sector with little protection and few rights. As Sheryl Sandberg, Chief Operating Officer of Facebook, said, women are not making it to the top of any profession in the world (THE Guardian <https://www.google.com>)

Today, gender bias continues to create huge barriers for many women. Ongoing struggles include ensuring equal economic opportunities, educational equity and an end to gender-based violence.

(women's rights <http://www.acly.org>)

It can be concluded that women's and girls' rights are human rights. They cover every aspect of life, health, education, political participation, economic well-being and freedom from violence among many others. Women and girls are entitled to the full and equal enjoyment of all of their human rights and to be free from all forms of discrimination. This is fundamental to achieving human rights, peace, security, and sustainable development. Women's and girls' human rights are more widely understood and championed today, but that needs to be the reality for every woman and every girl. No discrimination, No Violations, No exceptions.
